Everything Starts With an Idea...

From the lifeblood of a company, its customers; to its most valuable resources, its employees; we help companies learn what matters most. Elguji Software drives innovation by helping companies understand which ideas are worth pursuing and which ones are not, and most importantly why.

Simple, yet powerful

The concept is amazingly simple, yet extraordinarily powerful. People post their ideas and others then vote, agreeing or disagreeing by "promoting" or "demoting" ideas as they see fit. Comments enable voters to elaborate on why they voted a certain way.

Good ideas rise to the top, bad ideas fall to the bottom. The comments will tell the story why an idea is good, bad or ugly.

How can an organization maximize their return on investment of intellectual capital?

To quote Albert Einstein, "I never teach my pupils; I only attempt to provide the conditions in which they can learn."

By empowering your organization with Elguji's IdeaJam, your team will gain from the wisdom of the masses in ways you never thought were possible. The power of many is the perpetual power source that every organization needs.

IdeaJam is its fuel.

"IdeaJam has every engaging and usable aspect of the Web 2.0/AJAX era one can imagine, and has a real visual appeal. I can see a lot of behind-the-firewall application for the application"

— Ed Brill, Director, End-User Messaging and Collaboration at IBM

Who should use IdeaJam?

IdeaJam is the perfect solution for every department in your organization:

- ▶ Marketing
- ▶ Human Resources
- ▶ Sales
- ▶ Research and Development
- ▶ Information Technology
- ▶ Accounting
- ▶ Customer Service
- ▶ Plant and Facilities
- ▶ Corporate Communications

Empowering your employees with IdeaJam can improve processes in ways never thought possible. By letting your employees collaborate on ideas to build a better company, they in fact will do just that. IdeaJam is easy to install and can be up and running in about an hour.

Key Features

Key Features

- ▶ **Tags** — All ideas are “tagged” with one or more tags. Users can then use tag clouds to see which tags are popular.
- ▶ **Statistics** — See a graphical view of ideas by IdeaSpace, Votes by Date, Weekly Voting Trend, Votes by IdeaSpace, Votes, Ideas and Comments by IdeaSpace.
- ▶ **News Feeds** — IdeaJam makes extensive use of news feeds (RSS) including feeds for idea spaces, a specific idea, a user or for any given tag.
- ▶ **Views** — Ideas can be viewed by popularity, most recent, most comments, recent comments and more. Each view also has an associated RSS feed.
- ▶ **User Profiles** — Users can view their own ideas, their comments, and the ideas they voted on.
- ▶ **What's Hot** — See which ideas are active today, which ones were active yesterday, last week and the last 28 days.
- ▶ **Multi-Lingual** — IdeaJam has language support for Dutch, English, French, German, Italian, Russian and Spanish.
- ▶ **Customize Look and Feel** — IdeaJam can easily blend in with your company's intranet or other websites.

“I think that IdeaJam is not only a powerful tool for sharing and community, it's also one of the classiest web apps I've seen. What's more, the back-end, is equally sleek. Nice work on the part of the design team; they did not allow themselves to be constrained by conventional thinking. It's simply beautiful.”

— Eric Mack, eProductivity Specialist

Allow Notes Database icon to have 24-bit (=16.7 million) colors
IdeaSpace: Domino Designer
Tags: notes
Mika Heinonen - 24 Oct 2007 / Comments (23)
Demote
No Opinion Currently only 16 colors are possible.

Promote 297
Allow .png and .svg image resources
IdeaSpace: Notes Client / Other
Tags: imageresources, enhancement
Kerr Rainey - 01 Nov 2007 / Comments (37)
Demote
No Opinion Enable us to add .png and .svg files as image resources and have them render in the notes client.

Full DXL round-trip of DESIGN ELEMENTS
IdeaSpace: Domino Designer
Tags: dxl, design, database
Rocky Oliver - 26 Jan 2008 / Comments (35)
Demote
No Opinion There is another idea for Full DXL Round-trip, but it is for both design and data. This idea hopes to take smaller bites of the elephant that is DXL support. Lotus should begin by making design elements 100% round-trippable in the next version of Notes. This would open many doors ...

Hide-When Formulas - Improve visibility in Domino Designer
IdeaSpace: Domino Designer
Tags: notes, designer, interface
Bill Whittakers - 22 Sep 2007 / Comments (13)
Demote
No Opinion Add a separate dialog to display and enter hide-when formulas to improve visibility and access in designer; and/or add shading to indicate where hide formulas exist, as is done with pass-thru HTML.

Promote 245
Export to PDF from Notes (and not just from Symphony)
IdeaSpace: Notes Client / Core/Frameworks (Incl. sidebar, rich text editor)
Tags: pfd, export
Knud Højslet - 21 Nov 2007 / Comments (6)
Demote
No Opinion Quite a disappointment to see, that the new feature "Export to PDF" is only available from the productivity editors and not from notes-core (document and viewlevel).
