What's new in Version 1.6.2?

- Version 1.6.2 contains no new features.

Bugs fixed in Version 1.6.2

- Fixed Idea validation errors for French Language files
- Fixed problem with foreign characters not displaying properly in Votes tab of a user's profile
- Fixed problem where extra Submit button was appearing when editing an Idea using the Plain Text idea form
- Fixed issue with comments and French characters in language file

If you are not running version V1.6.1 of IdeaJam it is required that you first upgrade to V1.6.1.

License keys are now required to run IdeaJam. License keys are placed in the IdeaJam Control Panel. If you don't already have your license keys for IdeaJam please contact Support at IdeaJamSupport@elguji.com. They will generate the necessary license keys for your server(s).

If you are a new IdeaJam customer installing V1.6.2 you should refer to the "IdeaJam Installation, Setup and Customization Guide" located at <http://elguji.com/support>.

Before You Begin Your Upgrade

Before you upgrade your existing IdeaJam databases please ensure you have made a backup of the IdeaJam database as well as the IdeaJam Votes database. The IdeaJam V1.6.1 databases should also be signed with the appropriate administrative ID. We highly recommend that you seek the advice of your Lotus Notes/Domino Administrator before you begin your upgrade.

Upgrading your IdeaJam will require that you:

1. Replace the designs of the IdeaJam and IdeaJam Votes databases.
2. Edit and save the IdeaJam Control Panel.

Replacing the Design of Your IdeaJam and IdeaJam Votes Database

IdeaJam Database

Replace the design of your IdeaJam database with the **IdeaJam_V1_6_2.ntf** template from Domino Administrator.

IdeaJam Votes Database

Replace the design of your IdeaJam Votes database with **the IdeaJam_Votes_V1_6_2.ntf** template from Domino Administrator.

Customer Support

Please contact Elguji Customer Support at IdeaJamSupport@elguji.com if you have any questions about upgrading your IdeaJam to V1.6.2.
