What's new in Version 1.7.2?

There are no new features in V1.7.2. This version is a maintenance release for V1.7.1.

If you are not running version V1.7.1 of IdeaJam it is required that you first upgrade to V1.7.1.

Bugs fixed in Version 1.7.2

- Fixed display of Implementation Plan fields when using FCKEditor 5.5.
- Fixed a problem where secure IdeaJam sites could not properly load MooTools script libraries from the login screen.
- Fixed a CSS validation issue in System Tasks screen.
- Fixed a potential redirection looping issue with the Welcome Page feature.
- Fixed Advanced Search problem with filtering IdeaSpaces which contain square brackets.
- Re-aligned weighting for tag clouds on Tags page to better suit smaller IdeaJam sites.

Other Important Information

License keys are now required to run IdeaJam. License keys are placed in the IdeaJam Control Panel. If you don't already have your license keys for IdeaJam please contact Support at IdeaJamSupport@elguji.com. They will generate the necessary license keys for your server(s).

If you are a new IdeaJam customer installing V1.7.2 you should refer to the "IdeaJam Installation, Setup and Customization Guide" located at <http://elguji.com/documents>.

Before You Begin Your Upgrade

Before you upgrade your existing IdeaJam databases please ensure you have made a backup of the IdeaJam database as well as the IdeaJam Votes database. The IdeaJam V1.7.2 databases should also be signed with the appropriate administrative ID. We highly recommend that you seek the advice of your Lotus Notes/Domino Administrator before you begin your upgrade.

Upgrading your IdeaJam will require that you:

1. Replace the designs of the IdeaJam and IdeaJam Votes databases.
2. Edit and save the IdeaJam Control Panel.

Replacing the Design of Your IdeaJam and IdeaJam Votes Database

IdeaJam Database

Replace the design of your IdeaJam database with the **IdeaJam_V1_7_2.ntf** template from Domino Administrator.

IdeaJam Votes Database

Replace the design of your IdeaJam Votes database with **the IdeaJam_Votes_V1_7_2.ntf** template from Domino Administrator.

Updating the IdeaJam Control Panel

Open the IdeaJam Control Panel and click on the “Save” button. This will upgrade the IdeaJam version stamp on the database to V1.7.2. Click on the “Close” button to close the IdeaJam Control Panel.

Need Assistance – Contact Customer Support

Please contact Elguji Customer Support at IdeaJamSupport@elguji.com if you have any questions about upgrading your IdeaJam to V1.7.2.
