IdeaJam™ Idea Management Software

IdeaJam V1.8 New and Notable Features

A Set of Developer API's

A set of Web Services and JSON API's (Application Programming Interfaces) that allow developers to easily interact and extend IdeaJam programmatically:

- addComment Add a comment to an idea.
- addIdea Add a new idea.
- findIdeaById Find an idea by it's IdeaJam ID.
- getIdeaSpaces Get a list of IdeaSpaces.
- getRecentComments Get a list of recent comments.
- getRecentIdeas Get a list of recent ideas.
- getRecentIdeasByAuthor Get a list of recent ideas for an IdeaJam participant.
- getRecentIdeasByTag Get a list of recent ideas for a given tag.
- getStats Get the number of ideas, comments, votes and IdeaJam participants.
- getTopInnovators Get a list of the Top Innovators and their scores.
- getTopTags Get a list of the top tags.
- getVotesForIdea Get the list of votes for an idea.
- getWhatsHot Get a list of the ideas that are currently hot.
- searchIdeas Get a list of ideas for a search term.

Comment Moderation

- IdeaJam participants can now modify comments that they have entered in IdeaJam. Comments can be modified within fifteen minutes after they have been entered.
- IdeaSpace and IdeaJam Administrators can now moderate comments by either deleting or modifying them.
- The name of the person and date the comment was deleted is displayed where the comment was removed.
- When a comment has been modified the word "Modified" is added to the comment.

Lotus Connections Business Cards

IdeaJam V1.8 provides Lotus Business Card integration which allows users to click on a users name to see their Lotus Connections business card. This feature can be turned on or off by the IdeaJam Administrator.

Idea Linking

IdeaJam now supports multiple ideas linked together and also allows ideas from other IdeaSpaces to be linked together.

Other Features

- New Top Innovators iWidget for Lotus Connections.
- New "Suggested Tags" feature makes it easy for participants to tag ideas.
- The "What's Hot" list of ideas can now be selectively displayed in the side bar.
- Tag selection has been improved by using a drop down list of tags for a participant to select from.
