Bugs fixed in Version 1.1a.....	2
Before You Begin Your Upgrade.....	2
Step 1 – First Upgrade to IQJam V1.1.....	3
Need Assistance – Contact Customer Support .....	3

## What's new in Version 1.1a?

- None

## Bugs fixed in Version 1.1a

- Fixed an issue on the Ask a Question page affecting IE browsers where the cursor was being placed in the middle of the rich text editor instead at the top.
- Fixed a CSS issue affecting IE browsers in the Questions views where the tags were not properly spaced after the label "Tagged".
- Added the new IQJam logo as the default logo in the database design.

If you are a new IQJam customer installing V1.1a you should refer to the "IQJam Installation and Setup Guide" located at <http://elguji.com/documents>.

## Before You Begin Your Upgrade

**IMPORTANT:** IQJam V1.1a requires IBM Lotus Domino version 8.5.2.

**IQJam API:** The API now supports JSONP. Existing calls to the JSON API will need to be modified as per the instructions on the IQJam Developers Page. Contact [iqjamsupport@elguji.com](mailto:iqjamsupport@elguji.com) if you have any questions.

Before you upgrade your existing IQJam database(s) please ensure you have made a backup copies. The IQJam V1.1a database should also be signed with the appropriate administrative ID after your upgrade.

We highly recommend that you seek the advice of your Domino Administrator before you begin your upgrade.

Upgrading your IQJam will require that you:

1. First upgrade to IQJam V1.1. Please download and read the IQJam V1.1 Release Notes carefully prior to upgraded to V1.1a.
2. Replace the design of the IQJam database and sign the databases with the appropriate ID.
3. Edit and save the IQJam Control Panel.
4. Enable the Schedules Agents.

## **Step 1 – First Upgrade to IQJam V1.1**

Before upgrading IQJam to V1.1a please ensure that you have already upgraded to IQJam V1.1. Also, please carefully review the Release Notes and ensure that your upgrade to V1.1 was successful.

## **Step 2 - Replacing the Design of Your IQJam Database**

Replace the design of your IQJam database with the **IQJam\_V1\_1a.ntf** template from Domino Administrator. Sign the database with the appropriate ID.

## **Step 3 – Edit and Save the IQJam Control Panel**

Edit and Save the IQJam **Configuration > Control Panel**.

## **Step 4 – Enable the Scheduled Agents**

All of the IQJam agents have been disabled by default. You will need to enable the appropriate ones as required. You can do this in the **Configuration > Scheduled Agents** from the Lotus Notes client.

## **Need Assistance – Contact Customer Support**

Please contact Elguji Customer Support at [IQJamSupport@elguji.com](mailto:IQJamSupport@elguji.com) if you have any questions about upgrading your IQJam to V1.1.
